

# Sphero Charging Case™

Designed to charge, store, secure, and carry six Sphero BOLT or Sphero SPRK+ robots.<sup>1</sup>

Specs: 150mm (H) x 207mm (W) x 428mm (L) | 3.2 kg

## PC Locs makes life easier.

**Safe & Easy Transport.** Carrying Sphero robots can feel like a juggling act, but with the Sphero Charging Case, you'll never have to worry about dropping a robot during transport. The compact and light frame of the Sphero Charging Case, coupled with sturdy carrying straps, makes transportation safe and easy, even for younger kids.

**Neat and tidy.** Say goodbye to tangled cords. All of the charging cords are stored in a separate compartment underneath the inductive bases, keeping your charging case neat and tidy 100% of the time.

**Secure Storage.** Your Sphero robots and accessories won't be wandering off. A strong aluminium case and keyed lock secure your valuable Sphero investment when not in use.

**Innovative Design.** The open design of the station allows users to easily see all six Sphero robots during charging, even while they're securely locked away.

**Space for Accessories.** A separate compartment in the front of the Sphero Charging Case is designed to hold Sphero accessories such as maze tape and protractors.

# Think Inside the Box

## Reconfigure Current PC Locs Products.

Many of our mobile device charging carts and stations feature a flexible, open concept design that can hold STEM/STEAM technology. Remove one or all of the device racks or baskets to reconfigure the charging cart or station to make it suitable for charging, powering and storing robotics, 3D printers, VR goggles and much more.

## Create a Mobile STEM/STEAM Lab.

Not enough Sphero robots to go around? Our Sphero Charging Cases fit perfectly inside several of our charging carts, making it easy to convert a cart into a mobile STEM/STEAM lab that can be shared between classrooms. And don't forget, the cart can also charge, store and secure all of the tech housed inside so that your STEM/STEAM equipment is always ready for use.

## Additional Key Benefits

**Efficient Charging.** Clip the inductive charging bases included with your Sphero BOLT or Sphero SPRK+ robots into the charging station to simultaneously charge six robots.

**Ultra Compact.** We know that classroom space is scarce. The Sphero Charging Case only takes up as much desk space as a shoe box. Now that's compact!

**Perfect for Any Size STEM/STEAM Program.** No matter how big or small your Sphero Edu program is, the Sphero Charging Case can help you charge, store, secure and share Sphero robots quickly and easily.

**Tough as Nails.** Students can be rough on equipment, but PC Locs products are built to last with a lifetime warranty.<sup>2</sup>
