LIFETIME WARRANTY

Tower Specs: 1696 (H) x 523 (W) x 478 (D) mm | 88 kgs
Compartments: 73 (H) x 365 (W) x 438 (D) mm
Network Kit Specs: 153 (H) x 531 (W) x 478 (D) mm | 13.5 kgs
Network switch not included with network kit.
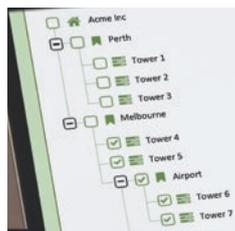

PC Locs makes life easier.

Compatible & Efficient Charging.
All 15 compartments are equipped with a power outlet and a 2.4 amp USB port, so you can charge almost any device, including: iPads, tablets, laptops, mobile phones, Chromebooks and more.[1]

Physical and Digital Security.
In addition to physical security, the FUYL Tower 15 is built on highly secure AWS architecture that is both reliable and scalable. Centralised encryption infrastructure, MFA authentication and monitoring alarm infrastructure further data protection.

Connected. Our innovative management software allows you to be in control from anywhere. Once FUYL Towers are connected to the local network via Ethernet or Wi-Fi, designated admins can view, access and manage them remotely.

RFID Ready. The FUYL Tower supports almost every RFID standard on the market including HID and MiFare: (MIFARE® Classic, MIFARE DESFire® 0.6, MIFARE DESFire EV1, HID: iCLASS® Standard/SE/SR/Seos; PIV II, Secure Identity Object® (SIO®).

Network Connected.

An optional network kit vastly expands the data transfer capabilities of the FUYL Tower through individual Ethernet connections. With the network kit installed, each compartment has the ability to sync information to and pull data from each device connected inside the Tower.

Additional Key Benefits

Three Access Modes. User Mode means that lockers are open to the public, similar to a hotel safe. Admin/Kiosk Mode allows admins to set each locked compartment's PIN or allocated RFID tag. API Mode enables organisations to build connectors that control the Tower's capabilities in the best way that suits for their workflow.

Easy to Set Up. Easy to Use. Easy to Service. A simple Startup Wizard guides administrators through the Tower setup process. The intuitive prompts on the LCD display are easy for Tower users to follow and understand. Hardware and electrical components are designed for easy serviceability in the field.

Visibility into Each Bay. Each compartment door has a hardened plastic window for viewing the contents inside. Window-blocking plates are also included for organisations that prefer locker privacy.

Future-Proofed. Software and firmware upgrades available via the Management Portal.

Active Directory Integration. With the ability to integrate with Active Directory and Microsoft 365, admins can login to the Portal using their username and password stored on their corporate directory.

4.3" Graphical Color Display. In addition to online access to the Tower, administrative functions are also available from the LCD Control Module and Keypad. Administrators can unlock, inspect, quarantine, perform diagnostics and reset systems directly from the Tower.

Sleek Design. The FUYL Tower's sleek, minimalist design adapts to any environment.

Tough as Nails. Designed with passive ventilation to minimise heat build-up during charging, the FUYL Tower stays cool under pressure, and it's backed by our lifetime warranty.[2]
